

2022 CISO Priorities

Cybersecurity executives in CRA's CISO communities identified the following areas as critical to their 2022 security strategy

CYBERSECURITY COLLABORATIVE

Through our research with 650+ CISO Leadership Board members, we have compiled a list—not ranked, but representative – of the top 20 security issues CISOs are focused on today:

- Application Security (SDLC, DevSecOps)
- Asset and Vulnerability Management
- Cloud Security: CASB/SASE; on-prem to cloud best practices; containers & API
- Data Lifecycle Management (Security, Regionalization)
- End Point Protection
- Future State of Cybersecurity
- Identity & Access Management
- Incident Response Planning
- IT/OT and IoT Security
- Malware/Ransomware Readiness
- Personal Leadership Skill Development
- Privacy Regulations & Impact on Data Security
- Security Awareness & Education
- Security Metrics & Communication Strategies
- Security Program Automation
- Stakeholder Engagement/Relationship Building with Business Leadership
- Third-Party Risk Assessments & Monitoring
- Threat Landscape/Current Security Events
- Workforce Recruitment & Development
- Zero Trust
